

I . 4 Study Description Form

Study Description Form: Japan (JGSS-2017G)

Study Title Japanese General Social Surveys 2017 Globalization
Fieldwork Dates From Nov., 2017 to Dec., 2017
Principal Investigators Noriko IWAI, Kuniaki SHISHIDO, Takayuki SASAKI, and Hachiro IWAI
Fieldwork Institution Central Research Services, Inc.
Population Men and women 20-89 years of age living in Japan
Sampling method Two-stage stratified random sampling; stratified by regional block and population size
Fieldwork Methods Placement (self-administered) method

Way the module was fielded (Check √)

-- as an independent survey

-- as part of a larger survey

If the module was fielded as part of a larger survey, the survey name that the EASS module was fielded with

JGSS-2017G

Initial Sample Size 1,500

N. of respondents 860

Response Rates

Total Issue	1,500
Total EASS questionnaire received (1.0)	860
Eligible, Non-interview (2.0)	620
Refusal and break-offs (2.10)	322
Non-contact (2.20)	231
Other (2.30)	67
Unknown eligibility (3.0)	19
Not Eligible (4.0)	1
Valid Response Rates	64.0% (JGSS's official formula) 57.3% (N. of R. / Initial Sample Size)

Language Japanese

Weighted Yes

Weighting Procedure Although we did not use weighted sampling, our dataset includes a variable 'WEIGHT'. This variable adjusts the sampling error and the nonresponse bias. The distribution of respondents' sex and 10-year age group in the weighted dataset corresponds to that of the population on October 1, 2017 which was estimated by the government based on the 2015 Census.

Known systematic properties of the sample

Some nonresponse biases exist in the sample. The sample has fewer rates of males in their 20s and higher proportion of females in their 50s.

Deviation from EASS questionnaires

This survey used placement method. Therefore the form of questionnaire is very different from the original questionnaire.

Please refer our questionnaire for details.

Publication

Nothing at the present moment.

Remarks on the Survey

This survey used placement method. Therefore, the order and forms of questions differ from those of the original questionnaire. Values of some standard background variables are constructed from responses to two or more questions.

Study Description Form: Japan (JGSS-2018G)

Study Title Japanese General Social Surveys 2018 Globalization
Fieldwork Dates From Nov., 2018 to Dec., 2018
Principal Investigators Noriko IWAI, Kuniaki SHISHIDO, Takayuki SASAKI, and Hachiro IWAI
Fieldwork Institution Central Research Services, Inc.
Population Men and women 20-89 years of age living in Japan
Sampling method Two-stage stratified random sampling; stratified by regional block and population size
Fieldwork Methods Placement (self-administered) method
Way the module was fielded (Check ✓)
 -- as an independent survey
 -- as part of a larger survey
If the module was fielded as part of a larger survey, the survey name that the EASS module was fielded with
 JGSS-2018G
Initial Sample Size 1,200
N. of respondents 678
Response Rates

Total Issue	1,200
Total EASS questionnaire received (1.0)	678
Eligible, Non-interview (2.0)	502
Refusal and break-offs (2.10)	291
Non-contact (2.20)	168
Other (2.30)	43
Unknown eligibility (3.0)	20
Not Eligible (4.0)	0
Valid Response Rates	62.7% (JGSS's official formula) 56.5% (N. of R. / Initial Sample Size)

<i>Language</i>	Japanese
<i>Weighted</i>	Yes
<i>Weighting Procedure</i>	Although we did not use weighted sampling, our dataset includes a variable ‘WEIGHT’. This variable adjusts the sampling error and the nonresponse bias. The distribution of respondents’ sex and 10-year age group in the weighted dataset corresponds to that of the population on October 1, 2018 which was estimated by the government based on the 2015 Census.
<i>Known systematic properties of the sample</i>	Some nonresponse biases exist in the sample. While the sample has fewer rates of females in their 30s and 80s, the proportion of female in their 50’s are higher compared to general population.
<i>Deviation from EASS questionnaires</i>	This survey used placement method. Therefore the form of questionnaire is very different from the original questionnaire. Please refer to our questionnaire for details.
<i>Publication</i>	Nothing at the present moment.
<i>Remarks on the Survey</i>	This survey used placement method. Therefore, the order and forms of questions differ from those of the original questionnaire. Values of some standard background variables are constructed from responses to two or more questions.

National Population Characteristics: Japan

*Please provide the following information about known characteristics of national population from the relevant high-quality data sources, e.g., census or other government surveys. In case when a country doesn’t possess relevant statistics, the country is strongly advised to provide whatever statistics that is closest to the national characteristics. Also, the groupings of each item below could possibly be country-specific, except for Gender and Employment Status.

SOURCE OF THE STATISTICS: Population Census of Japan 2010 and 2015, Labor Force Survey 2015, Comprehensive Survey of Living Conditions of the People on Health and Welfare 2017

GENDER

Male	60,495,472	48.7%
Female	63,788,429	51.3%
