The KGSS comprises four parts: The first part includes replicating core questions. The second part is the International Social Survey Program (ISSP) module, which is a cross-national survey of 42 countries (2018 ISSP module: Religion). The third part is the East Asian Social Survey (EASS) module. The last part contains modules proposed by researchers.

No - required background question(s) missing → Question 49

49. Please provide details of the questions missing and indicate why they are missing.

Reason(s) why missing:

Here we ask questions on sampling.

50. First, was your sample designed to be representative of ...

Only adult citizens of your country?

Adults of any nationality residing in your country?

51. Second, was your sample designed to be representative of ...

Only adults living in private accommodation? → Question 52

Adults living in private and in institutional accommodation (e.g., residential homes for the elderly, asylum accommodation)?

If private and institutional, please enter details in box below.

Please enter in:
 Cf. Approximately 98.8% of the adult population in South Korea live in private accommodations (Population and Housing Survey in Korea, 2011). Excluded from the survey is those residing in institutional arrangements, such as dormitories, military quarters, work camps, nursing homes, and so on.

52. Third, what was the lower age cut-off for your sample?

WRITE IN :

53. Was there any upper age cut-off for your sample?

Yes - please write in cut-off

No cut-off

54. Were any groups excluded or under-represented in your sample design, apart from the age cut-offs or citizenship requirements just asked about?

No

Yes (please write in details)

If yes, write in details:

55. Did you use any variables for stratification?

Yes →Question 55

No →Question 56

56. Please describe the stratification variables used?

We explicitly stratified the frame to improve the efficiency of estimates considering potential geographic and urban/rural homogeneity. Required numbers of PSUs were independently selected from each KwangYok Si/Do. The 100 PSUs were proportionally allocated to each KwangYok Si/Do based on the number of households.

57. How many of stages does your sampling design have?

One stage

Two stages

Three stages

Four stages

58. Does your sampling frame consist of...?

- Addresses
- Households
- Named individuals (the target persons)
- Named individuals (not the target persons)
- Areas
- Something else (please write in details)
-

59. Please describe your sampling frame (e.g., population register, electoral roll, telephone directory and its coverage and updating).

Please write in:

Under the supervision of the SRC, the supervisor of interviewers in each university created the addresses of housing units.

60. Please describe your sampling method and your sampled units for the first stage?

Please write in:

The primary sampling unit (PSU) for the 2018 KGSS is a Dong, Eub, or Myon. We selected 100 PSUs for the 2018 KGSS with probability proportional to size.

61. Please describe your sampling method and your sampled units for the second stage? (only if you have two or more stages, otherwise continue with question 64)

Please write in:

The secondary sampling unit (SSU) is defined as Tong/Ban (for Dong) or Li (for Myon). Each SSU is systematically selected from each selected PSU with probability proportional to size.

62. Please describe your sampling method and your sampled units for the third stage?
(only if you have three or more stages, otherwise continue with question 64)

Please write in:
After completing the sampling frame for each selected Tong/Ban, a fixed number of Housing unites is systematically selected.

63. Please describe your sampling method and your sampled units for the fourth stage?
(only if you have four stages, otherwise continue with question 64)

Please write in:
After compiling a list of adults 18 years of age or older for each selected household, an adult is selected using the last birthday method at the time of interview. In 2018, the total number of completed interviews was 1, 031.

64. What selection method was used to identify a respondent?
Please tick all that apply. (do not answer if your sampling frame consists of named individuals - which are the target persons. Then continue with question 66)
